

JAPAN TAKES PRECAUTIONS.

Foreign Warships to be Prevented By Force, if Necessary, From Entering Certain Ports.

RUSSIA INCLINES TO PEACE.

Wishes of Japanese Will be Met in Such a Way as Will Maintain Peace.

London, Jan. 21.—Cabling from Tokyo the correspondent of the Standard says the privy council has approved an urgent ordinance empowering the commanders of admiralty stations to prevent foreign warships, by force, if necessary, from entering certain ports in times of emergency.

The Tokyo correspondent of the Daily Telegraph declares the privy council, at the meeting today, discussed a proposal to issue an order, in the event of war, declaring a state of siege in certain places outside of Japan and a blockade.

A dispatch to the Pall Mall Gazette from Berlin declares that the correspondent is in a position to announce positively that it has been decided at St. Petersburg that Japan's wishes shall be met in such a way as to secure the maintenance of peace. The dispatch adds that the only question is whether Russia "shall declare her decision to Japan alone or to all the powers interested in the solution of the far eastern question."

The St. Petersburg correspondent of the Daily Telegraph says he learns that the dispatches of the Russian viceroy, Alexieff, now incline toward efforts for a diplomatic settlement, on the ground that war would check the natural course of events, which must promote Russian aspirations in the far east. The correspondent argues that the key to the problem is the army, and not the navy, and that no artificial barriers can long prevent Russia from playing her part.

The Times correspondent at Tokyo cables that the privy council has adopted drafts of urgency ordinances relating to maritime defenses, the transportation of troops by rail and the organization of field postal service.

The correspondent of the Times stationed at Vladivostok, under date of Jan. 19, cables as follows: "No military movements are being made here toward the south, and the prospects for peace are improving. I am informed that work has been suspended on the new railway through Mongolia to Kalgon."

DEATH FROM PNEUMONIA.

New York Health Board Studying Remedies.

New York, Jan. 21.—In order to check the increase in the number of deaths from pneumonia and other diseases due to inclement weather, an advisory board of leading physicians appointed by the health department has formulated rules for the guidance of the public.

Deaths from pneumonia, influenza, diphtheria and similar ailments last week numbered 673, which was an increase of 21 over the preceding week and 121 over the record of the opening days of January. There has been a jump in the number of cases of pulmonary consumption, 248 being reported last week, an increase of 47 over the preceding week.

The advice given by the advisory board recommends among other things the discontinuance of using feather dusters by house maids. The physician's statement says:

"Exposure to cold, over exertion, lack of physical vigor, abuse of alcohol, etc., predisposes the individual to pneumonia but are not its direct cause. The bacteria germs which are the immediate excitants of pneumonia are usually conveyed in the dust of air, contaminated by spores, and which, when inhaled, not always of those who are ill, which upon drying is widely disseminated."

It is therefore most important that in the cleaning of private houses and all public conveyances and places of assembly the methods adopted should be such as will remove and destroy the germs, and not simply stir up the dust, which, when contaminated, may inhaled in susceptible persons some form of acute pneumonia as well as tuberculosis, and the most common colds, catarrhs, etc.

"Feather dusters should be abandoned and moist cloths used for dusting. When practicable, sweeping should be done in the evening, so that floating dust may be completely settled before removal by moist cloths in the morning. Most mops should be passed over floors when these are uncarpeted as part of the morning dusting."

Peanuts Are a Luxury.

Philadelphia, Jan. 21.—Peanuts are becoming a luxury. Cotton has been raising so high in the last four months that southern peanut farmers have begun the cultivation of cotton. Consequently the price of peanuts has advanced rapidly.

TRAIN'S BRAIN REMOVED.

Unusually Heavy, Showing no Signs of Withering.

New York, Jan. 21.—Thousands of persons, many of them children, have viewed the remains of George Francis Train which are lying in state in a funeral home in New York. The remains will take place today.

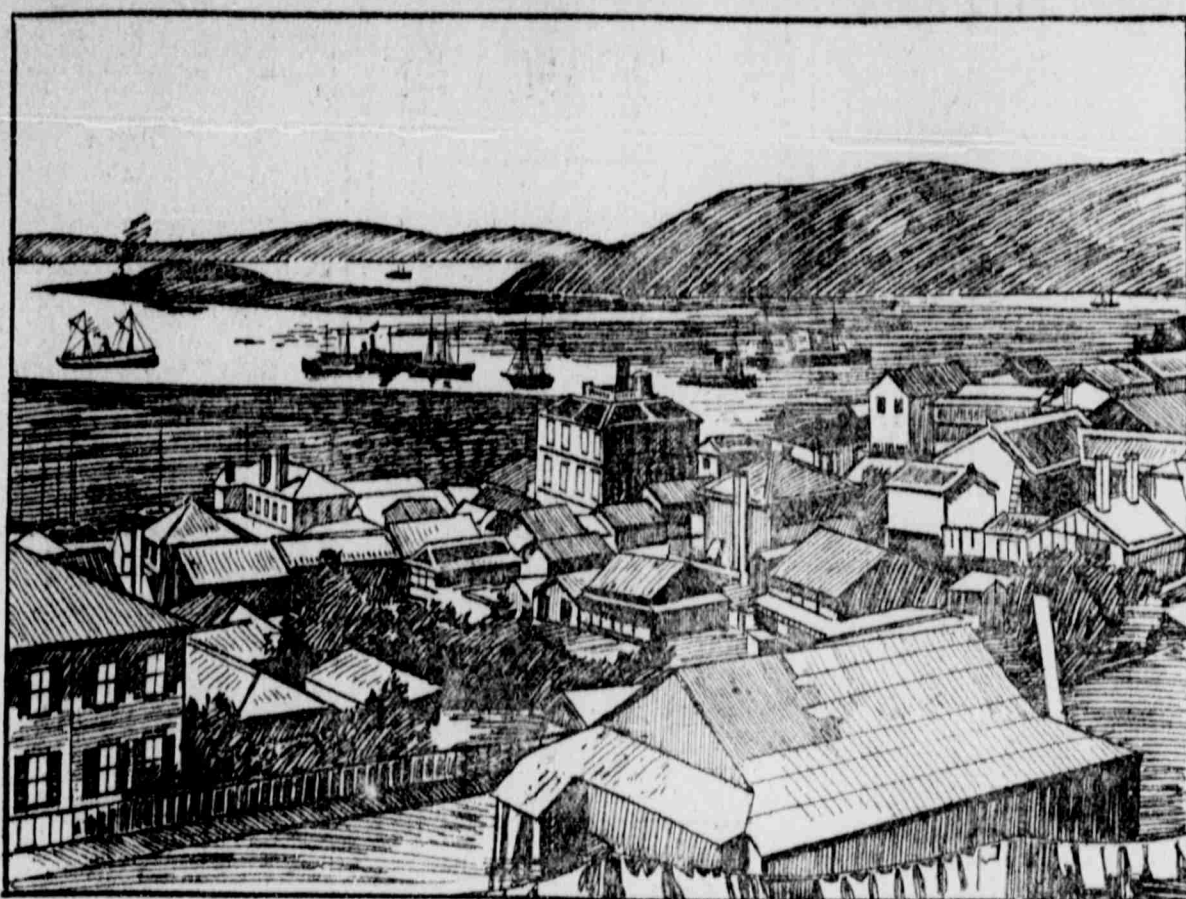

Scientists, with the consent of Mr. Train's relatives, have removed the brain for the purpose of analysis. The organ was found to be remarkably heavy and showed no signs of withering. It weighed 228 ounces and ranks, according to medical records twenty-seventh in the list of brain weights of 106 world-famous men. This is six ounces more than the average.

Judge Zach Gibbons Dead.

Lexington, Ky., Jan. 21.—Judge Zach Gibbons, 64 years old, one of the best known attorneys in central Kentucky, a dead. He had been a member of the Kentucky bar 24 years.

Broker C. F. Stout Arrested.

Chicago, Jan. 21.—A prosperous ticket broker in a fashionable hotel by day, and a general receiver of stolen property by night, is the character given by the police to Charles F. Stout, who has for some time conducted a fashionable hotel. Stout has been arrested on the information of a burglar, who declares that he sold his stolen property to him, but did not receive its value. The broker was held in bonds of \$5,000.

VIEW OF CHEMULPO, THE PORT OF SEOUL, KOREA.

Chemulpo, Korea, is just now very much in the public eye, for it is there that the various governments are debarking the marines intended for the protection of the interests of their citizens in Seoul, the capital. Seoul is the most important city of the empire, having a population of about 250,000. Chemulpo has a population of about 50,000.

A NEW PORTRAIT OF THE KOREAN EMPEROR.

About twenty-five years ago the emperor of Korea had his photograph taken. That is the one with which readers of newspapers are familiar. Since then all efforts to induce him to give to the public a more recent portrait were unavailing until a few weeks ago, when the pretty wife of an English attaché persuaded the emperor into once more facing the camera. The result is herewith shown. It will be seen that there is practically no resemblance between the emperor as he is and as the old familiar pictures show him. This nominal ruler is now thought to be suffering from mental collapse, and it is certain that some of his recent edicts furnish ample warrant for that suspicion.

A CLEANLY AGE.

Twentieth Century Ideas Incline Toward Sanitation and Prevention.

Nowadays scientists believe that in cleanliness lies the secret of prevention of diseases.

To prevent a disease, remove the cause.

Just as unclean habits breed many diseases, so careless habits breed dandruff. Improper use of another's brushes, combs, etc., will surely cause dandruff, and in time, will just as surely cause baldness.

It's microbial infection, nothing more nor less.

Newbro's Herpicide kills the dandruff germ, and causes hair to grow luxuriantly. Herpicide is absolutely free from grease or other injurious substances.

Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. For sale by Z. C. M. I. Drug Dept.

COLOMBIAN WAR FEELING.

Advices from Bogota Indicate It Is Dying Out.

New York, Jan. 21.—Mail advices received from Bogota indicate, according to a Herald dispatch from Panama, that the war feeling in Colombia is dying out and there is a general desire to allow the Panama session to pass without a disastrous war.

Hitherto the newspapers of the capital have been filled with patriotic declarations that it would be necessary to have a war to reclaim the lost territory. Now all urge conciliation or anything to avoid further serious complications.

Juan B. Perceote, who has been negotiating war with the United States by speeches and writings, is reported to have been placed under arrest.

From Cartagena comes the report of great financial depression and the desire to establish business relations with the isthmus. Cartagena formerly had

the main outlet for her poultry, eggs and hides in Colon. This port is now closed to Colombian trade and there has been no substitute. Shipments made from Cartagena to the army at Atlanta are at ruinous rates.

Woman's Missionary Society.

New York, Jan. 21.—Women from all parts of the country are attending the forty-third anniversary meeting of the Woman's Union Missionary Society of America, being held here. This was the first woman's missionary society organized and its members represent nearly every shade of religious feeling, from Episcopal to Baptist.

Mrs. Henry Johnson presided, and nearly all the speakers appealed for greater financial assistance, if the work is not to be curtailed. The society's income in the year just ended fell from \$10,000 to \$20,000 below the expenditures of \$60,400. This was met by drawing upon reserved legacies, which it was said had greatly increased through special donations.

Two Burned to Death.

San Bernardino, Cal., Jan. 21.—Ozma Mochato and his four-year-old son Juan were burned to death in a fire which broke out at their home last night. The mother, grandmother and two other children managed to get out, but in an incredibly short time the building was destroyed.

PEOPLE WE KNOW.

They are Salt Lake City People, and What They Say of Local Interest

When an incident like the following occurs right here at home, it is bound to carry weight with our readers. So strange occurrences go on the rounds of the press; are published as facts, people become skeptical. On one subject skepticism is rapidly disappearing. This is due to the actual experience of our citizens, and their public utterances regarding them. The doubter must doubt no more in the face of such evidence as this. The public statement of a reputable citizen living right here at home, one whom you can see every day, leaves no ground for the skeptic to stand on.

Mrs. John Davis, John Davis, mason, of 1850 Second East, says: "A woman who has had attacks of backache for three years, one of which laid her up all winter, who has been under the care of physicians and experimented with every kind of medicine which is sold to be valuable for kidney complaint, knows something about what victims of that far too prevalent ailment endure. For quite a while after a physician's treatment I had respite but an attack just as mysteriously appeared as its predecessor. Knowing what neglect meant when I happened to read an advertisement about Doan's Kidney Pills in a Salt Lake City paper, I was easily induced to go to the F. J. Hill Drug Co.'s store for a box. Its use proved to me that the remedy is up to representation. When I found that the medicine acts directly upon the kidneys and the aching and pain is allayed if not actually suppressed, I came to the conclusion that a dose or two stops the trouble in the early stages. In this way I frequently appeal to Doan's Kidney Pills, and up to date have never appeared in pain."

Sold for 50 cents per box by all dealers. Foster-Milburn Co., Buffalo, N. Y., sole agents for the United States. Remember the name—Doan's—and take no substitute.

DANGER STILL EXISTS IN SEOUL.

Sending of Guards There Has Done Much to Insure Safety Of Foreigners.

THE AMERICAN POSITION.

It is Peculiar—Accidental Killing by Electric Cars Might Precipitate A Bad Riot.

New York, Jan. 21.—Prompt action by the various nations in bringing guards here has done much, says a Herald dispatch from Seoul, Korea, to insure the safety of foreigners, but it is certain that danger still exists, only needing some unfortunate incident at this critical moment to start a riot, which would possibly be led by Korean soldiers.

Horace N. Allen, the United States minister, says he is carefully abstaining from any entanglements in the political situation. "My action regarding the guards," he said, "was first, and was quite independent of the American position here, which is peculiar. The legation is surrounded by the palace and a large force of Korean troops. There are American women and children living in Seoul, and there is extensive American electric railway and lighting property here. An accidental killing by the electric cars is liable to cause riots, as previously occurred when a mob, led by Korean soldiers, attacked American citizens. The natives are generally devoted to the Americans. The small coterie of temporarily influential courtiers are opposed to them because of personal reasons."

"These circumstances, therefore, indicated the advisability of providing a guard. The Americans are now amply protected and I consider the charges safe. The American guard is orderly and well liked."

The people largely blame Yi Yunng Ik, a powerful favorite of the emperor, for the constantly increasing troubles and great distress throughout the country. His remarkable influence with the emperor alone has prevented the opening of Wiju and other much needed reforms.

Many petitions are being made to the emperor for favoring execution or banishment, including one from the prime minister, and a powerful secret society already formed and possessing more than 2,000 members has sworn to kill Yi Yunng Ik and two other favorite officials.

In the meantime a large consignment of cartridges and gunpowder has reached Seoul, consigned to Yi Yunng Ik. His followers are exceedingly numerous, including the ancient guild of Poosang to whom the emperor has just issued 600 revolvers and swords. Yi Manseel, formerly chief justice, has been arrested for informing the emperor that in the event of war his majesty probably will be deposed in favor of the Prince Eulwha now in Washington.

LEVIED ON "CONTENTS."

And the "Contents" of Building Included Typewriter Girls.

New York, Jan. 21.—A deputy sheriff has taken possession of an eight-story granite building of the board of education at Park avenue and Fifty-ninth street, to satisfy judgments aggregating about \$20,000. He levied not only on the building, but also on its "contents," which included a lot of pretty typewriter girls and the board of superintendent. He was prevailed upon, however, to satisfy the execution by retaining a fast hold upon the building. Meanwhile, the board's employees are carrying on business as usual while the deputy stands guard.

Four Brooklyn school teachers brought, some time ago, suit for unpaid salaries for services before the consolidation of the boroughs forming Greater New York. They won their case against the board of education last December and the board was ordered to pay. An appeal was taken as the city should have been sued and not the board of education.

The new corporation counsel has decided, however, that the city would have to pay in the end and when the execution was made he advised the board to settle and so get rid of the deputy. This probably will be done.

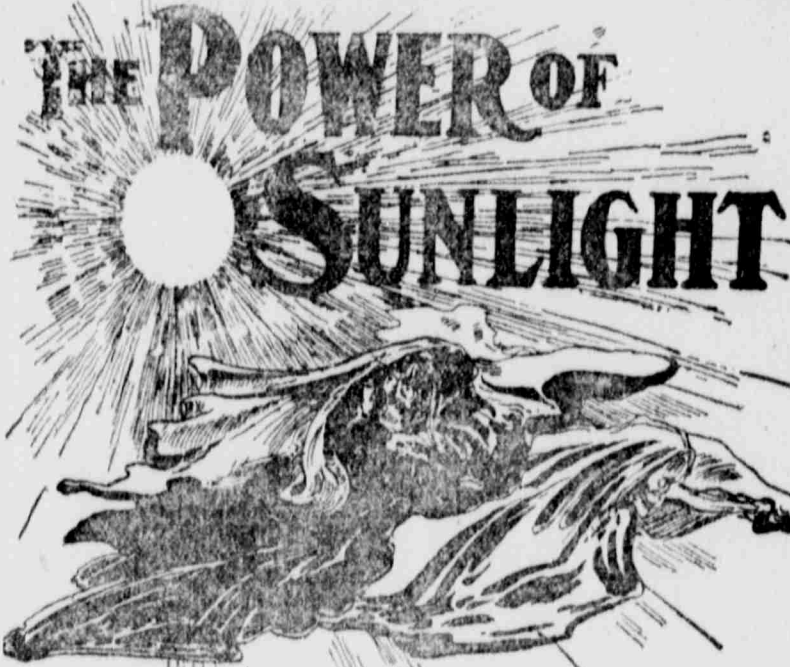

INSOLENT TROLLEY CO.

Town Council of West Hoboken, N. J., Takes Its Franchise Away.

New York, Jan. 21.—Angered because of what they declare to be wretched

service on the part of the trolley company, the town council of West Hoboken has passed an ordinance revoking the franchise granted to the North Hudson County railway company in 1895. The North Hudson is one of the subsidiary companies of the Public Service corporation of New Jersey, which controls hundreds of miles of line connecting the various cities and towns about Jersey City.

The ordinance will not become operative until it has been advertised in the official papers for five days. Then it is declared, the Public Service corporation will have no legal right to run a single trolley car on any street in the town and the poles and wires will have to come down. The police will be ordered to arrest all conductors and motormen who attempt to run cars. The company may run horse cars under a franchise still effective. Hundreds of indignant citizens were in attendance at the meeting of the town council and Mayor Nolan in speaking upon the measure before it was put to a vote, said every effort had been made to secure better transportation but without avail.

The Power of Sunlight.

THE USE OF LIGHT IN CURING DISEASE.

THE best disinfectant of all is sunlight. It destroys by its very brightness all sorts of germs and at the same time helps the growth of plants and animal life. Doubtless all have noticed that mould grows during the night and in dark lamp cellars. Bright sunlight quickly destroys germs, mould or other organisms. That is why it is best to let the sunlight into your houses for its purifying influence. Not only is sunlight a disinfectant, but it is one of the best foods known. It was Finsen who discovered that concentrated sunlight would cure many tumors and cancerous growths. A substitute for sunlight was then found to be still more effective, and that was the concentrated rays from arc lamps.

At the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., Dr. R. V. Pierce, chief consulting surgeon, started experiments, some three years ago, with the Finsen light in conjunction with the X-ray in the treatment of diseases. He got excellent results therefrom, and was among the first to adapt this remarkable cure to many cases which it was formerly supposed must of necessity be treated by the knife.

Not only is Dr. R. V. Pierce notable for his surgical achievements at his hospital in Buffalo, but nearly a third of a century ago he discovered certain roots and herbs which were nature's remedies, and succeeded in putting them up in a form that would be easily procured and ready to use. This he called Dr. Pierce's Golden Medical Discovery. Along with its use he advises every one to take exercise in the outdoor air, to get all one can of God's sunlight and air; also a mild breathing exercise to be practiced each day. This "Medical Discovery" gives no false stimulation because it contains neither alcohol nor narcotics. It helps digestion and the assimilation of such elements in the food as are required for the blood. Instead of a cold liver oil, against which the already sensitive stomach will declare open rebellion, this tonic has a pacifying action upon the sensitive stomach and gives to the blood the food elements the tissues require. It maintains the patient's nutrition by giving him no fat, retain, digest and assimilate nutritious food. It overcomes gastric irritability and symptoms of indigestion, and in this way fever, night-sweats, headaches, etc., are done away with. It fortifies the body against the germs of consumption, grip and malaria, and it builds up the tissues and puts on healthy flesh.

A MILLION FOR A STOMACH. One of the greatest American millionaires said the other day to his physician, "A million dollars, Doctor, spot cash and no grumbling, for a new stomach," and then the sick man groaned and turned away. All his wealth could not make him happy or contented, for happiness largely depends upon digestion. Without health where does happiness come in, and of what use is many millions of dollars, or even one million? One of a man's greatest pleasures is that born of a keen appetite, vigorous digestion and a good dinner, and this belongs to many a good fellow who is living on small

wages but is able to buy a beefsteak now and then and have the healthy digestion to assimilate it, but the rich man without a stomach has to forego the juicy steak and the good things of the table because his stomach rebels. After all the stomach plays a great part in everyday life. Without a healthy stomach and a good digestion our blood is thin, watery and poor, our heart action is weak, our liver does not do its duty, and man is miserable and unhappy. In this condition man is prey to the germs of influenza, consumption, malaria and all the ills that flesh is heir to.

Consumption can be treated by natural methods, by methods which are as close to nature as possible. The treatment is brought within the reach of the poorest classes not only in curing the disease in its beginning, but in the prevention of disease by putting the house in order and strengthening the system against the germs of disease. We now understand the cause of consumption, that plague of the earth which, according to the census, kills off twelve of every one hundred inhabitants of the United States.

"I suffered from dyspepsia over five years, during which time I tried everything we could hear of as being recommended for that trouble, but all to no avail, and I was getting worse," writes Mrs. J. H. Gernand, of 2602 Avenue G, Galveston, Texas. "Our family physician gave me medicine, but it was like taking so much water. One year before the storm of 1900, I was taken dangerously ill. Contracted a cold and it settled in my stomach, leaving me with every description of female trouble. I had six of the best physicians in Texas attending me, and all said that I could not live one month without an operation—to which I would not submit; and, as their medicine only served to make me worse, they gave me up to die. I suffered excruciating pain, and when the effect of morphine gave out I would go into convulsions. I was so sore could not move in bed for two months, and when the last doctor gave me up, I sent, through the service of a friend, and purchased a bottle of Dr. Pierce's Favorite Prescription, also one of 'Golden Medical Discovery,' and, after taking four doses I did not feel any more pain; this result after having spent several hundred dollars in doctors' bills and medicine which gave no relief. Four bottles of your medicine has completely cured me."

"I took only four bottles of Doctor Pierce's Golden Medical Discovery and two vials of his 'Pleasant Pellets,' and these remedies did me a world of good," writes W. Walter McGlothen, of Reinbeck, Iowa. "I am thankful for your kind advice and praise the medicines highly. Will recommend Dr. Pierce's medicines to all my friends as the best medicines ever made for the troubles for which they are recommended. There is nothing equal to them for stomach troubles."

NATURE'S BOOK. Those desiring to know something about the body in health and disease, also medicine and surgery, without technicalities, should read 'The People's Common Sense Medical Adviser,' by R. V. Pierce, M. D., which can be had for thirty-one cents in one-cent stamps for the cloth-bound, twenty-one stamps for paper-bound book. Address Dr. R. V. Pierce, Buffalo, N. Y.

GARDNER DAILY STORE NEWS

Tomorrow and Saturday

Two days more and Utah's most remarkable clothing sale will be an event of the past, ever to be remembered by the thousands who have benefited by its monstrous value-giving, as the most phenomenal and fearless bargain fete in the annals of merchandising in this state. Tomorrow and Saturday remains the chance which will soon be gone, and its equal may never be had again.

\$15.00, \$18.00, 20.00 and \$25.00 Winter Suits and Overcoats

Two days more of the giving of \$15.00, \$18.00, \$20.00 and \$25.00 Suits and Overcoats for \$10.00. The giving of \$2.00 Soft Shirts for \$1.00. 75c, \$1.00 and \$1.25 Stiff Shirts for 50c. The giving of many other heretofore unheard of Bargains in Men's Hats and Pants, and Boys' Suits, and Overcoats. Are you going to let them pass, or are you going to save dollars (many of them) on the clothes you need as others have done the past two weeks?

ONLY TWO DAYS MORE OF THE BIG SALE.

ONE PRICE.

J. P. GARDNER,

136-138 Main Street.

ORDERS BY MAIL PROMPTLY FILLED.
